Quality Yarn Supplier

Rieter Com4 Yarns

Yarns of Choice

Who is Rieter?

Rieter is an industrial group based in Winterthur, Switzerland, and operating on a global scale. Formed in 1795, the company is a leading supplier of short-staple spinning machinery and technology components, and has the widest product range in this industrial sector worldwide. Rieter has a presence in ten countries with 18 manufacturing locations and a global workforce of some 5 630 employees.

Rieter – The System Supplier

Rieter possesses a comprehensive know-how of the entire textile process chain. Rieter offers its customers, as the only textile machine manufacturer worldwide, not only complete plants and systems for the 4 production processes – ring, compact, rotor and air-jet spinning – but also experience in the processing of fibers right up to the finished fabric.

Convincing Yarn Brands

The 4 different Rieter spinning technologies produce 4 different yarns – ring, compact, rotor and air-jet yarns, that are different in their yarn structure.

Unique products merit a brand name. The ring yarn spun on Rieter ring spinning machines is marked under the trademark Com4ring, the compact yarn produced on the compact spinning machine or on Rieter ring spinning machines with COMPACTdrum, COMPACTapron and COMPACTeasy is marketed under the trademark Com4compact, the rotor yarn from the rotor spinning machine under the trademark Com4rotor and the air-spun yarn from the air-jet spinning machine under the trademark Com4jet.

In response to the growing market demand for recycled yarns, Rieter extended the brand. In conjunction with a Global Recycled Standard (GRS) certification, the following yarns containing recycled material can be licenced:

Com4recycling-ring, Com4recycling-compact, Com4recycling-rotor.

Yarns spun on Rieter spinning machines fulfill the most challenging requirements. Outstanding properties and constant high quality safeguard the competitive edge in a dynamic market. Each of these yarns is distinguished by a special yarn character and its related yarn properties. The yarns have different qualitative or economic advantages, not only for downstream processors but also for end users.

The following listed licensees offer Rieter quality yarns. Based on a license contract our licensees use the possibility to market their yarn under the brand Com4.

In addition to this, Rieter extended the yarn brands to also supply the recycling market.

How to become a licensee?

- 1** Initial requirement – the customer produces with Rieter end spinning machines. For Com4recycling yarns the precondition is that customers produce with a Rieter card, draw frame and end spinning machine. In addition, a Global Recycled Standard (GRS) certification is needed.

- 2** The customer takes up contact with the Rieter sales manager responsible and asks for the relevant license contract for Com4ring, Com4compact, Com4rotor, Com4jet yarn, Com4recycling-ring, Com4recycling-compact, Com4recycling-rotor.

- 3** The license contract contains all the criteria to be fulfilled by the customer.

- 4** If all the conditions are fulfilled, the license contract is signed according to the agreement reached between the customer and the sales manager.

- 5** As official confirmation, the customer receives an appropriate certificate.

- 6** From this point in time, the licensee profits from various Rieter marketing activities.
